

UTKARSH CHAUDHARY

Python / Django Backend Developer | Delhi NCR
+91-9760009293 | utkarshchaudhary63@gmail.com | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Backend Developer with 3+ years of experience designing and scaling REST APIs using Python, Django, and Django REST Framework in production, multi-cloud environments (AWS, Azure, GCP). Skilled in database optimization, asynchronous task processing (Celery, RabbitMQ), and real-time systems (WebSockets). Delivered features that contributed to 40% product revenue growth in 6 months. Seeking an SDE-2 backend role to build scalable, high-performance systems.

TECHNICAL SKILLS

- **Languages:** Python, Java, JavaScript, HTML, CSS
- **Backend:** Django, Django REST Framework, Celery, RabbitMQ, WebSockets
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Cloud & DevOps:** AWS (Boto3, IAM), Azure (AVD, AD, FSLogix), GCP, Docker, Kubernetes, Jenkins
- **AI / Tooling:** OpenAI APIs, Prompt Engineering, Gen-AI, Postman, JIRA, Confluence, vCenter, SFTP, GNU Encryption

EXPERIENCE

Software Engineer

Techademy (IIHT Pvt. Ltd.)

July 2023 – Present

Pune, Maharashtra

- Led design and development of scalable REST APIs using Python and Django REST Framework across multiple production products.
- Designed and implemented Role-Based Access Control (RBAC) and integrated GCP as a core public cloud provider for the platform.
- Built real-time notification infrastructure using WebSockets, improving user engagement and reducing perceived latency.
- Optimized PostgreSQL queries through advanced indexing strategies, cutting API response times and reducing database load.
- Shipped features that contributed to 40% product revenue growth within 6 months by identifying and closing user-experience gaps.
- Reduced VM provisioning time by 30% by introducing background processing with Celery and folder-based VM distribution in vCenter.
- Automated and encrypted an SFTP-based reporting module, cutting manual delivery delays by 80%.

KEY PROJECTS

Make My Labs — VM Provisioning & Management Platform

Tech: Python, Django REST Framework, React, PostgreSQL, MongoDB, AWS, Azure, GCP, vCenter

- Led backend development for a multi-cloud lab platform spanning public (AWS/Azure/GCP) and private (vCenter) infrastructure.
- Integrated GCP as a lab provisioning target and optimized API response times to improve platform responsiveness.
- Built automated workspace provisioning and advanced reporting features used across enterprise client accounts.
- Processed and analyzed datasets of millions of records using Python (Pandas) to power data-driven reporting dashboards.

Yaksha — Assessment Platform

Tech: Python, Django REST Framework, React, PostgreSQL, MongoDB

- Built an SFTP-based sync pipeline for real-time delivery of assessment results to client portals.
- Implemented GNU-encrypted automated report delivery to meet enterprise client security requirements.

GitHub AI PR Reviewer — AI-Powered Code Review Bot

Tech: Python, OpenAI API, Flask, Streamlit, GitHub API

- Built an automated bot that analyzes GitHub pull requests and posts AI-driven review feedback as PR comments.
- Integrated GitHub authentication and comment APIs to fully automate the review-and-feedback loop.
- Reduced manual code review effort for contributors by surfacing issues before human review.

EDUCATION

M.Tech, Shri Venkateshwar University
Score: 76/100

April 2020 – May 2022

B.Tech, Moradabad Institute of Technology
Score: 68.7/100

April 2015 – May 2019

CERTIFICATIONS & TRAINING

- PGP Software Developer — NIIT StackRoute (Sept 2022 – March 2023)
